PROFILE

Results-driven Software Engineering student with a strong portfolio in full-stack development and CMS management. Experienced in building custom web applications using PHP Laravel and ASP.NET Core, as well as delivering client- focused solutions via WordPress and Shopify. Proven track record of collaborating with digital agencies to create responsive, high- performance websites. Adept at bridging technical logic with user-centric design to drive business growth.

WORK EXPERIENCE

Sofinity Digital

Web Developer (Contract/Freelance)

2025 --

- Built and launched 2 professional WordPress websites from the ground up, handling end-to-end development including custom theme design, layout structuring, and tailored plugin integration to meet each client's specific functional and visual requirements.
- Developed 2 fully functional Shopify stores, managing the complete setup process including product catalog organization, collection structuring, payment gateway configuration, and targeted UI enhancements such as improved navigation and call-to-action placement to increase user engagement and conversion rates.
- Designed and delivered a responsive website using HTML5 and CSS3, implementing a mobile-first development approach to ensure seamless performance across all screen sizes, with thorough cross-browser testing to guarantee consistent appearance and functionality on Chrome, Firefox, Safari, and Edge.
